Important Information -Voluntary Nationwide Recall ratio-Ectosone (TEVA-ECTOSONE) 0.05% Mild lotion 60mL (DIN 00653209)

Out of Specification Result- Lot 688519 Expiry 06/30/2024

Distributed by Teva Canada Limited - Canadian Market Only

Teva Canada Limited, with the knowledge of Health Canada, is initiating a nationwide voluntary Type I Retail (Pharmacy) level recall of one (1) lot of prescription drug ratio-Ectosone (TEVA- ECTOSONE) 0.05% 60ml Lotion due to out of specification result for any unspecified degradant product.

This recall does not affect any other lots or dosage strengths of ratio- Ectosone (TEVA- ECTOSONE) products distributed by Teva Canada Limited.

The product is available in 60mL presentation and is a topical anti-inflammatory drug and used for inflammation and itching.

What to Do

Check the lot number on the product label: Consumers who have purchased ratio-Ectosone (TEVA-ECTOSONE) 0.05% mild lotion 60mL are asked to check the lot number on the product label. If it has 688519 as the lot number expiring June 30, 2024, they are advised to stop using the product and return it to the pharmacy/store where they purchased it.

Medical Questions or Side Effects

This Public Communication is not intended as medical advice. To understand the implications of this information to your health, it is important that you consult a doctor or health care professional. Managing marketed health product-related side effects depends on health care professionals and consumers reporting them. Any case of unexpected side effects in patients using ratio-Ectosone (TEVA-ECTOSONE) 0.05% lotion should be reported to Teva Canada Limited and/or Health Canada.
